How to use:

1. Add area of interest by clicking/drawing on the map or uploading a file
2. Click on **Choose Downscale Parameters**, select wanted parameters and click **Apply**
3. Click on **Generate Results**, choose output format/resolution and click on **Launch Downscale Process**
4. For csv output, click on **Download Downscaled Data** underneath the preview in the popup window. For GeoTIFF output, click on **Download Downscaled Data** under the raster preview options in the main side panel (pictured below)
5. To start again, click on **Clear Selections**

Step 4: CSV Output
